

Plasmid DNA Preparation

Flexible, Fast, and Flawless:
Your Trusted Source for Plasmid Preparation

Fast Turnaround
(2-3 Business Days)

Flexible Scales
(5 µg to 5 mg)

Industry-Leading
Low Endotoxin Level

Additional Services, Including:

- Starting Materials**
- Plasmid DNA
 - Bacterial Colony
 - Bacterial Culture
 - Agar Stab
 - Gibson Assembly (GA) Reaction
 - Ligation Reaction
 - Glycerol Stock

- Sequencing Validation**
 - Sanger Sequencing
 - Nanopore Sequencing
- Sequence Alignment**
- Restriction Enzyme Analysis**
- Endosafe® Endotoxin Testing Certification**
- Glycerol Stock Preparation**
- Concentration Normalization**
- Sample Aliquoting into Tubes or PCR Plates**

Turnaround

Samples are processed daily with 2-3 business days turnaround

*Actual time might vary depend on the scales and starting materials
