

Vector Verify Campaign

Know Your Vector — Free Sequencing

How well do you know your vector?

Hidden mutations in shared vectors often go undetected, creating a critical sequence-reality gap that sabotages cloning and experiments. Stop guessing. Start trusting your research foundation.

Through our Vector Recruitment Campaign, get **FREE** whole-plasmid Nanopore sequencing (regularly \$15). We validate your vector's true identity, store it securely, and ensure 100% accuracy for all future synthesis.

Free Onboarding

Free Whole Plasmid Sequencing

100% Sequence Coverage

Contact us at sales.us@quintarabio.com to submit your vector. Secure your **FREE** whole-plasmid sequencing now!
